SUMMARY

Final-year BTech Computer Science student passionate about machine learning and applied AI. Hands-on experience building and deploying ML models and backend services through two internships and multiple projects. Seeking ML Engineer / AI Engineer roles where I can work on production ML systems.

EDUCATION

Bachelor of Technology (BTech), Computer Science and Engineering
Pune Institute of Engineering and Technology, Pune (Tier-2)
2021 - 2025 (Expected) | CGPA: 8.2 / 10

Higher Secondary (Class XII), Science (PCM)
Maharashtra State Board, 2021 | 89.4%

WORK EXPERIENCE

Machine Learning Intern ? NeuralNest AI (Startup), Bangalore (Remote)
May 2024 - Jul 2024 (3 months)

- Built an image classification pipeline using PyTorch achieving 91% accuracy on a custom defect-detection dataset.
- Containerized the model with Docker and exposed it via a FastAPI inference endpoint, reducing average response latency from 480ms to 110ms.
- Set up basic experiment tracking with MLflow and wrote data-cleaning scripts in Python and pandas.

Technologies: Python, PyTorch, FastAPI, Docker, MLflow, pandas

Backend Engineering Intern ? Qualex Systems (Mid-size company), Pune
Dec 2023 - Jan 2024 (2 months)

- Developed and tested 8 REST API endpoints in FastAPI backed by a PostgreSQL database for an internal inventory tool.
- Wrote unit tests and added Git-based CI checks, improving code coverage to 75%.
- Collaborated with a team of 4 using Git and Agile sprints.

Technologies: Python, FastAPI, PostgreSQL, Git, Docker

PROJECTS

1. RAG Chatbot for College FAQs

Built a retrieval-augmented chatbot that answers student queries from college documents using LlamaIndex, ChromaDB, and an open-source LLM. Reduced repetitive queries to the admin office in a pilot test.

Technologies: Python, LlamaIndex, ChromaDB, Hugging Face, Streamlit

2. Image Classifier for Plant Disease Detection

Trained a CNN in PyTorch to classify 5 plant diseases from leaf images with 88%

validation accuracy. Deployed as a simple web demo.
Technologies: Python, PyTorch, OpenCV, Flask

3. REST API for Expense Tracker

Designed and built a secure REST API with JWT authentication and CRUD operations for a personal expense tracker.

Technologies: Python, FastAPI, PostgreSQL, Docker

4. Personal Portfolio Website

Built a responsive portfolio website to showcase projects and blog posts.

Technologies: React, JavaScript, HTML, CSS

5. GenAI Resume Analyzer (Ongoing)

Building a tool that analyzes resumes against job descriptions using LLMs and embeddings to give fit scores and improvement suggestions. Work in progress.

Technologies: Python, LangChain, OpenAI API, FAISS

SKILLS

Programming Languages: Python, SQL, JavaScript (basic)

Frameworks & Libraries: PyTorch, FastAPI, pandas, scikit-learn, React (basic)

Tools & Platforms: Docker, Git, MLflow, Linux, VS Code

Databases: PostgreSQL, SQLite, ChromaDB

Soft Skills: Problem-solving, Teamwork, Communication, Fast learner

CERTIFICATIONS

- Machine Learning Specialization ? Coursera (Andrew Ng / DeepLearning.AI), 2023

TARGET ROLES

ML Engineer, AI Engineer
